

Are you aged 17-25? Do you have ADHD or an ASC?

Tell us what you think and earn £25!

We are currently looking for young people aged 17-25 with attention deficit hyperactivity disorder (ADHD) or who have an Autistic Spectrum Condition (ASC) to take part in a research project. Could you spare about 45 minutes to chat to us about your experiences? The Big Lottery Fund has asked ECOTEC, an independent research organisation, to look at the views and experiences of young people with ADHD or an ASC in the transition to adulthood. This will help Big Lottery Fund to understand how they might be able to assist young people in the future.

As a thank you for your time you will receive **£25**.

We are keen to hear from young people who have had help or support from health or other services as well as people who have not had as much help or support.

The research will be **completely confidential** and you will not be identified within the results.

You can take part by telephone, face to face or by email or skype/MSN.

**To take part or for more information
please contact:**
